

# Where Did the Neonates Treated at MCH with Pre-Existing Conditions Come From?

- 150,770 Neonates were born in Miami-Dade, Broward and Palm Beach Counties (tri-county) for the last 5 years.
- In that 5 1/2 year period MCH treated 2,266 or 2% of the total neonates.
- Of the 2,266 neonates that MCH admitted, 1,520 (67%) were diagnosed with conditions considered to be high-risk before birth.

This list represents 753 of the 1,520 neonate admissions referred from institutions in the tri-county region which had pre-existing conditions.

The balance of admissions between the 753 and the 1,520 neonates treated with pre-existing conditions were admitted from outside the tri-county area, and/or through the MCH Emergency Room Department.
